ATEK Companies Launches New Corporate Web site

Web site provides portfolio overview and serves as portal into business units

MINNEAPOLIS, MINN. (Sept. 24, 2008) – [ATEK Companies](http://www.atekcompanies.com), a leading manufacturing solutions provider serving diverse industries including medical, aerospace, defense, communications and transportation, has launched its new Web site. The redesigned site — www.atekcompanies.com — showcases and synchronizes its five business units. Providing a broad overview of the company’s offerings, the site also serves as a portal into the business unit Web sites.

“The Web is a tool often used to gather information about a company prior to engaging with them,” said Kay Phillips, president of ATEK Companies. “By redesigning our business units’ sites and corporate site, we are creating cohesion across all ATEK divisions, allowing for a recognizable brand and services for our clients.”

ATEK Companies has also redesigned Web sites for divisions, [ATEK Medical](http://www.atekmedical.com) (www.atekmedical.com), [Larco](http://www.larco.com) (www.larco.com) and [ATEK Plastics](http://www.atekplastics.com) (www.atekplastics.com). Each site provides in-depth detail about the history of the division, services and capabilities, industries served, and current happenings. New sites for [ATEK Manufacturing](http://www.atekmanufacturing.com) (www.atekmanufacturing.com), ATEK Products (www.atekproducts.com) and [Progress Casting](http://www.progresscasting.com) (www.progresscasting.com) are in progress and will be launched in the near future.

About ATEK Companies

ATEK Companies is the preferred manufacturing partner serving diverse industries including medical, aerospace, defense, communications, and transportation. ATEK Companies distinguishes itself from the competition through its 60-year history of delivering unparalleled value, high quality products, and creative solutions. ATEK Companies offers total project management, including electrical and mechanical product design and launch, supply chain management, production, packaging and distribution, and post-production fulfillment services. ATEK Companies is comprised of five businesses, which include ATEK Medical, ATEK Manufacturing, ATEK Plastics, ATEK Products, and Progress Casting. Facilities are located in Minneapolis and Brainerd, Minn.; Kerrville, Texas; New Hampton, Iowa; Grand Rapids, Mich.; and Heredia, Costa Rica. For more information visit www.atekcompanies.com
