Larco Announces New Touchless Sensing Solution – U-WAV™

*Expansion of product line with innovative U-WAV Touchless Solution
Provides customers more options*

Brainerd, MN – March 7th, 2008 – Larco Manufacturing, the leading U.S. supplier of Automatic Door Mats and Handicap Wall Switches, today announced a new touch free sensing switch called the U-WAV™.

The U-WAV is an innovative sensor switch designed for touchless activation of automatic doors, lighting controls, or call points. It is ideal for sterile environments such as operating rooms or clean rooms because it provides a complete hygienic solution. Made using tough ABS plastic and advanced circuitry, the U-WAV provides reliable operation and is easily installed. It features an adjustable hold time of .5 to 10 seconds and has a detection range of 4 to 20 inches. In addition, the U-WAV can operate in two modes of operation, switch or sense, for additional functionality. It also has a universal wall plate design that fits most North American and European standard box sizes, and is CE and FCC approved.

“We are excited to serve our customers with a broader product offering. The U-WAV helps us do that by providing innovative technology that is practical,” said Varuni Novick, Larco’s president. “It can be flush or surface mounted depending on the installation, and can be ordered with custom colors, logos, and face decals to meet the needs of any customer.” Larco began shipping the U-WAV to customers this week.

About Larco Manufacturing

Since its founding over 50 years ago, Larco has become a household name in the automatic door industry. Pioneers in the automatic door mat, Larco today is part of the ATEK Companies, a management company with four other manufacturing companies based in Minneapolis, MN. Larco Manufacturing provides products to the automatic door industry, including door mats and handicap wall switches. For more information on Larco, please visit: <http://www.larco.com>.
